

# Lead Safe Work Practices Training Course

This training class will be presented at **no cost to attendees**. Those encouraged to participate include: home (or code) inspectors, contractors undertaking renovation, repainting, or remodeling work where lead-based paint may be encountered, maintenance workers, building supervisors and landlords, professional associations, state and local municipal agencies, community and social service organizations, and do-it-yourself homeowners.

The goal of this program is to teach attendees lead-safe work practices and the strategies for implementing them. Many homes built before 1978 contain lead-based paint, so it is important that renovation, remodeling and repair activities use methods that reduce and control dust and debris created during work. Even a small amount of dust can pose a serious health risk to children and families.

**NJ Health Officers/REHS' Earn 5.75 CEUs and Nurses Earn 5.40 NCHs.**
